| <b>Main Burners Rating</b>                | 48,000 BTU propane / 45,000 BTU NG                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Total BTUs</b>                         | 92,000 BTU propane / 83,000 BTU NG                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

Ensure proper gas pipe sizing. Diameter and length of the supply pipe may limit the pressure and BTU delivery.

For outdoor use only. Maintain at least 36 inches (915 mm) of clearance between the sides and back of the grill and any combustible surface. Never place the grill underneath an overhead combustible structure or surface.

High altitude kit available.
