

# Custom Grill Surfaces for Kalamazoo Grills

---

Custom quarter-inch-thick stainless steel grill grates available in four different variations; optimized for grilling meat, fish, vegetables and teppanyaki. Designed specifically for use with Kalamazoo grills.

## Custom Grill Surface Options

**Meat Grill Surface:** The meat grill surface pattern is optimized to grill just about any type of meat — supporting it while maximizing exposure to the open flame below. Because of the flat surface profile, the meat surface is ideal for burgers or other ground meats that are handled with a flat turner for flipping.

**Fish Grill Surface:** The fish grill surface pattern has a greater solid surface area to support delicate fish fillets while still allowing exposure to the flame below. Because of its significant contact area, the fish surface also excels at Cajun-style blackening, or providing an allover “pan-sear” for steaks. You can even use it for grilling marinated fajita peppers and onions, or stir fry, while preserving a good portion of the juices.

**Vegetable Grill Surface:** The vegetable grill surface pattern is optimized for grilling asparagus, green beans and other small items without the need for a grill basket. The slots are specifically sized to prevent these items from falling through the grates. The vegetable pattern is also the best all-around grill surface design for a variety of other cooking tasks because it balances supporting the food with its solid surface area, while still exposing food to the flame below.

**Plancha Grill Surface:** The plancha grill surface is made from solid quarter-inch thick stainless steel, optimized to retain heat. This grill surface is designed specifically to be used as a griddle; perfect for grilling bacon, eggs, pancakes, diner-style burgers, teppanyaki, and more. **Note:** for safety reasons, no more than 50% of the grilling area should be comprised of plancha surfaces.

Custom stainless steel grill grates

## Information for K500 Series Hybrid Fire Grills

— Two surfaces will fit in a K500 series Hybrid Fire Grill

- Custom grill surfaces for the K500 series are 11.5 inches x 22 inches
